

12 june 2012

L'evento principale "Economic development strategies – the role of public private partnership" del 12 giugno si inserisce in una settimana di lavoro, finalizzata alla prosecuzione della ricerca CLUDs ma anche alla presentazione del dottorato internazionale di ricerca sul tema della "Urban Regeneration and Economic Development". Il dottorato e le ulteriori iniziative di rafforzamento del progetto CLUDs sono il frutto dell'impegno della Regione Calabria a valere sul POR FSE 2007-2013. Nel quadro di queste sinergie attivate dal Progetto CLUDs, si concretizza la partnership con la Camera di Commercio di Reggio Calabria.

L'evento principale ha una duplice finalità:

1. Divulgare i risultati della prima fase del progetto CLUDs, in particolare approfondendo i fattori di successo dei partenariati pubblico privati nell'area metropolitana di Boston con gli stakeholder locali, con esperti della disciplina e con tutti gli interessati.

2. Presentare l'attivazione del dottorato internazionale "Urban Regeneration and Economic Development" finanziato nell'ambito del "Progetto per il potenziamento della rete internazionale sulla tematica della rigenerazione urbana connessa allo sviluppo rurale (PRInter) per il completamento e il supporto del progetto CLUDs – Marie Curie IRSES 2010 – VII Programma Quadro a valere sulle risorse dell'Asse V POR FSE 2007-2013 Regione Calabria al fine di rafforzare il network internazionale del progetto CLUDs con attività di alta formazione e di diffusione dei risultati.

L'attività messa in campo dal progetto CLUDs attraverso una sinergia funzionale ad innescare processi di sviluppo sostenibili e di crescita intelligente, tra il VII PQ della ricerca europea e il POR FSE 2007-2013 Calabria, anticipa la costruzione di iniziative coerenti con la nuova strategia Europa 2020 e Horizon 2020.

On June the 12th the International partners will present the first work package results in Reggio Calabria. Throughout one week work, partners will not only put the research project forward, but also organize the International doctorate on "Urban Regeneration and Economic Development", also launched on the 12th. Both the International doctorate and the further initiatives empowering the CLUDs project stem from the commitment of the Calabria Region on empowering local economy and human capital and are financed under the European Social Funds Operational Programme 2007-2013 of the Region of Calabria. The partnership with the Reggio Calabria Chamber of Commerce has the important task to better identify the way in which the technology transfer and research and enterprise link can be implemented.

The main event stwofold:

1. Disseminating the results of the first phase of the CLUDs project, in particular by sharing the success factors of the public-private partnerships acting on urban regeneration initiatives in the metropolitan area of Boston. Local stakeholders, experts and all interested people are invited to discuss the findings.

2. Publicizing the activation of the international doctorate "Urban Regeneration and Economic Development" financed by the "Project for the promotion and participation in the transactional network on the topic of urban regeneration linked to the rural development within the CLUDs project-Marie Curie IRSES 2010 – 7th framework program".

The joint activities of the project CLUDs based on the integration of Development policy and Research, through the Synergy between the ESFOP 2007-2013 Calabria and 7th FPof the European research anticipate the build of initiatives consistent with the new Europe 2020 and Horizon 2020 for the future programming period.
